Kane County Animal Control Offers Drive-Thru Rabies Vaccination Clinic August 28

Kane County Animal Control will host its third Rabies and Microchip Animal Clinic of the year on Saturday, August 28 from 10 a.m. to 1 p.m. at Kane County Animal Control, 4060 Keslinger Road in Geneva.

The clinic will be conducted drive-thru style. Dog and cat owners just pull up in their vehicle and let the staff and volunteers do the work. People do not need to get out of their cars, but are asked to please wear a mask so everyone remains safe and protected.

The cost of a one-year rabies vaccine (with tag) is \$20 for neutered pets, \$35 for non-neutered and \$10 for seniors with pets. Microchips are also available for \$15. Cash, check, VISA and MasterCard are accepted.

The clinic will run with two teams, each consisting of a doctor and staff, plus clerks to process paperwork and finances. The staff will leash the pet and transport them to the exam station. While the medical crew performs the exam and vaccinations, a clerk completes the rabies certificate and another handles payment. Once the procedure is completed, the vet will communicate with the owner in their car. After each vehicle pulls away, the staff cleans the station for the next client.

The animal control staff maintains proper infection control by wearing masks, gloves and scrub tops. Their goal is to help treat the animals in need and still provide a much-needed resource during these complicated times.

Additional clinics are planned for:

Wednesday, September 8 from 4:30 p.m. to 7 p.m.

Saturday, October 2 from 10 a.m. to 1 p.m.
