Kraft Singles subject of voluntary recall

Kraft Foods Group is voluntarily recalling 7,691 cases of select varieties of regular *Kraft* American Singles Pasteurized Prepared Cheese Product. A supplier did not store an ingredient used in this product in accordance with Kraft's temperature standards. While unlikely, this could create conditions that could lead to premature spoilage and/or food borne illness; therefore, the company is issuing the recall as a precaution.

Kraft has had no consumer illness complaints for this product associated with this recall. The affected product is limited to four varieties with "Best When Used By" dates of February 20, 2015, and February 21, 2015.

Consumers can find the "Best When Used By" dates on the bottom of the product package. No other *Kraft* Singles products are impacted by this recall. The affected product was produced at Kraft's Springfield, MO manufacturing facility.

Consumers who purchased these products should not eat them. They should return them to the store where purchased for an exchange or full refund. Consumers also can contact Kraft Foods Consumer Relations at 1-800-396-5512.
