### **Well and septic informational meeting scheduled.**

Are you a homeowner with a well and or septic system? Have you ever wondered how these systems work? Do you know what maintenance has to be performed so that they function properly? Do you know what type of septic system you have?

For the answers to these questions and more, the public is invited to attend our Well and Septic Homeowner's Workshop in conjunction with the Village of Campton Hills at 7 p.m., Sept. 11, at the Campton Township Community Center, 5N082 Old LaFox Road, St. Charles. Attendance is free, but space can be limited so we ask that you register in advance. If you would like to attend, please register by calling our office at (630) 444-3040. If you must leave a voicemail, please give your name, address, and phone number. We would like to hear from you by Sept. 9, 2014.

Water well test kits will be provided to attendees at no charge.

In active partnership with our community, the Kane County Health Department improves the quality of life and well-being of all residents by developing and implementing local policies, systems, and services that protect and promote health, and prevent disease, injury and disability.
