SUMMARY**

*VISION: All children will learn, grow and develop to realize their full potential.*

*Parents as Teachers is an evidence-based parent education and family engagement model serving families throughout pregnancy until their child enters kindergarten. Families receive personal visits typically in their homes from certified parent educators; group meetings; developmental, health, hearing and vision screenings; and linkages with community resources. The model has four goals: to increase parent knowledge of early childhood development and improve parenting practices; provide early detection of developmental delays and health issues; prevent child abuse and neglect; and increase children's school readiness and school success. It is adaptable to the needs of diverse families, cultures and special populations.*
